

# 15m NATIONALS ASTON DOWN - WEATHER BRIEFING

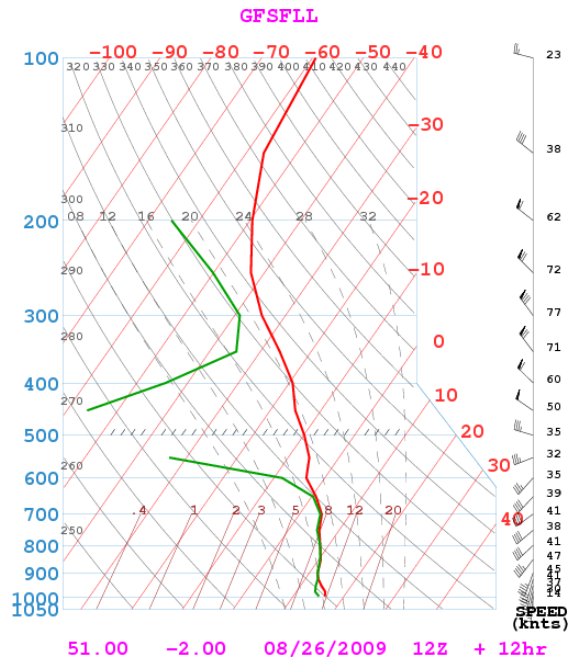

26th. August 2009

**26 0700**

**Vis 26 0900**

## General Situation.

The remains of Hurricane Bill are making their presence felt in the form of frontal rain and cloud, with a blustery S to SSW wind in its circulation. There are signs that once the next rainband clears, cloud amounts will decrease, but with wind speeds of 35-40kts at flying levels little soaring will be possible.

**OUTLOOK:** Winds moderating overnight. Blue thermals tomorrow to 3000ft!

**Freezing level.** 12,000ft.
